

# Exhibit H

**ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits**  
**510(k) Summary**  
**21 CFR 807.92**

As required by the Safe Medical Devices Act of 1990, coded under Section 513, Part (I)(3)(A) of the Food, Drug and Cosmetic Act, a summary of the information upon which substantial equivalence determination is based as follows:

**Submitter Information:**

JAN 14 2010

Applicant: Bard Peripheral Vascular, Inc  
1625 West 3<sup>rd</sup> Street  
PO Box 1740  
Tempe, Arizona 85280  
Phone: 480-638-2906  
Fax: 480-449-2546  
Contact: Joni Creal  
Regulatory Affairs Associate

**Subject Device:**

Device Trade Name: **ECLIPSE™ Filter System – Femoral Delivery Kit and  
ECLIPSE™ Filter System – Jugular/Subclavian  
Delivery Kit**

Common or Usual Name: Filter, Intravascular, Cardiovascular

Classification: Class II

Classification Panel: Cardiovascular

**Predicate Devices:**

G2 EXPRESS® Filter System – Femoral Delivery Kits (K082305)

G2 EXPRESS® Filter System – Jugular/Subclavian Delivery Kits (K082305)

**Summary of Change:**

The primary modification from the predicate device, the G2® EXPRESS Filter System – Femoral and Jugular/Subclavian Delivery System, to the subject device, the ECLIPSE™ Femoral Filter System and Jugular/Subclavian Delivery System, was an improvement of the surface finish of the filter raw material wire by electropolishing the wire prior to forming the filter. A cosmetic colorant modification to some of the molded components of the delivery kits was also made.

**Device Description:**

The ECLIPSE™ Filter consists of twelve electropolished shape-memory nitinol wires emanating from a central electropolished nitinol filter hook. These 12 wires form two levels of embolic filtration: the legs provide the lower level of filtration and the arms provide the upper level of filtration. The ECLIPSE™ Filter is intended to be used in the inferior vena cava with diameters less than or equal to 28 mm.

The ECLIPSE™ Filter System – Femoral Delivery Kit consists of a 7 French inner diameter (I.D.) introducer catheter and dilator set and a storage tube preloaded with the ECLIPSE™ Filter and pusher system. The dilator is fitted with 2 radiopaque marker bands spaced 28 mm apart for caval sizing. The introducer sheath contains a radiopaque tip and hemostasis valve with a side port for injecting contrast medium via a syringe. The storage tube and pusher system attach to the introducer and allow for delivery and deployment of the ECLIPSE™ Filter.

The ECLIPSE™ Filter System – Jugular/Subclavian Delivery Kit consists of a 10 French I.D. introducer catheter and dilator set and a delivery device preloaded with the ECLIPSE™ Filter. The dilator is fitted with 2 radiopaque marker bands spaced 28 mm apart for caval sizing. The introducer sheath contains a radiopaque tip and hemostasis valve with a side port for injecting contrast medium via a syringe. The delivery device fits within the introducer sheath and has a delivery mechanism to deploy the ECLIPSE™ Filter.

**Indications for Use of Device:**

The ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits are indicated for use in the prevention of recurrent pulmonary embolism via permanent placement in the vena cava in the following situations:

- Pulmonary thromboembolism when anticoagulants are contraindicated.
- Failure of anticoagulant therapy for thromboembolic disease.
- Emergency treatment following massive pulmonary embolism where anticipated benefits of conventional therapy are reduced.
- Chronic, recurrent pulmonary embolism where anticoagulant therapy has failed or is contraindicated.
- ECLIPSE™ Filter may be removed according to the instructions supplied under the section labeled: Optional Procedure for Filter Removal.

#### **Technological Comparison to Predicate Device:**

The technological characteristics of the subject device, the ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits, are substantially equivalent to those of the predicate devices, the G2® EXPRESS Filter System – Femoral and Jugular/Subclavian Delivery System (K082305), in terms of intended use, indications for use, application, user population, same operating principle, basic design, fundamental scientific technology, performance, packaging configuration and sterilization method.

#### **Conclusions:**

The ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits met all predetermined acceptance criteria of design verification and validation as specified by applicable standards, guidance, test protocols and/or customer inputs. The ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits is substantially equivalent to the legally marketed predicate device, the G2® EXPRESS Filter System – Femoral and Jugular/Subclavian Delivery System Kits (K082305 – cleared October 31, 2008).

Re: K093659

Trade/Device Name: ECLIPSE Filter System, Femoral and Jugular/Subclavian Delivery Kits  
Regulation Number: 21 CFR 870.3375  
Regulation Name: Cardiovascular intravascular filter  
Regulatory Class: Class II (two)  
Product Code: DTK  
Dated: December 17, 2009  
Received: December 18, 2009

Dear Ms. Creal:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please go to <http://www.fda.gov/AboutFDA/CentersOffices/CDRH/CDRHOffices/ucm115809.htm> for the Center for Devices and Radiological Health's (CDRH's) Office of Compliance. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to <http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm> for the CDRH's Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address <http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm>.

Sincerely yours,

*Bram D. Zuckerman*

## Indications for Use

510(k) Number (if known): K093659

**Device Name:** ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits

### Indications for Use:

The ECLIPSE™ Filter System – Femoral and Jugular/Subclavian Delivery Kits are indicated for use in the prevention of recurrent pulmonary embolism via permanent placement in the vena cava in the following situations:

- Pulmonary thromboembolism when anticoagulants are contraindicated.
- Failure of anticoagulant therapy for thromboembolic disease.
- Emergency treatment following massive pulmonary embolism where anticipated benefits of conventional therapy are reduced.
- Chronic, recurrent pulmonary embolism where anticoagulant therapy has failed or is contraindicated.
- ECLIPSE™ Filter may be removed according to the instructions supplied under the section labeled: Optional Procedure for Filter Removal.

Prescription Use X  
(Part 21 CFR 801 Subpart D)

AND/OR

Over-The-Counter Use \_\_\_\_\_  
(21 CFR 801 Subpart C)
